Cleaning and Shaping with Three Files Systems: Variable Taper Files, Fixed Taper Files and Reciprocating Files - a Hands-On Exploration

 27th October, 2023 (Friday) |  12PM-5PM (SGT) (Registration starts: 11.45AM)

 Carl Zeiss Office (80 Bendemeer Road #10-01 Singapore 339949)

OVERVIEW:

- Principles of Cleaning and Shaping
- The jump from conventional (Austenitic) Ni-Ti wires to heat-treated (Martensitic) Ni-Ti wires and its clinical implications
- Dentine preservation – Identifying critical areas of dentine to preserve for longevity of the root canal treated tooth
- An introduction to files that run in continuous rotation - variable taper files, fixed taper files, as well as files run in reciprocating motion
- Techniques for predictable endodontic instrumentation

HANDS-ON:

A hands-on exercise with one dental operating microscope per participant.

Participants to prepare the following extracted teeth with access cavities and closed apices:

- 1 × 2-canal Premolar
- 1 × Maxillary Molar
- 1 × Mandibular Molar

Feel free to bring more teeth if you'd like to have more practice!

REGISTRATION FEES:

SDA member: **150** SGD

Non-member: **200** SGD

Cleaning and Shaping with Three Files Systems: Variable Taper Files, Fixed Taper Files and Reciprocating Files - a Hands-On Exploration

PROGRAMME SCHEDULE:

11.45AM	Registration
12.00PM – 1.15PM	Lecture Part 1 (Principles of cleaning and shaping Heat-treated NiTi files. Importance of dentine preservation)
1.15PM – 1.45PM	Short break
1.45PM – 2.15PM	Lecture Part 2 (Introduction on various types of Files and its properties)
2.15PM – 3.15PM	Hands-on
3.15PM – 3.45PM	Lecture Part 3 (Introduction to reciprocating files)
3.45PM – 4.45PM	Hands-on
4.45PM – 5.00PM	Q&A

REGISTRATION FEES:

SDA member: **150** SGD

Non-member: **200** SGD
