Everyday Endodontics with Contemporary Materials

Stay ahead of the curve with our newly expanded **4-day** Everyday Endodontics course, designed with an interdisciplinary emphasis.

Gain practical, evidence-based, hands-on experience guided by experienced specialists, integrating insights from multiple dental disciplines to enhance your clinical decision-making and treatment outcomes.

Scan QR code to
Register Now

Date (1st Weekend)

20 & 21 September 2025

Address

Simulation Lab, NUCOHS
**Level 9, Lower Kent Ridge
Rd, S119085**

Time

9AM - 5PM

Date (2nd Weekend)

27 & 28 September 2025

Address

Carl Zeiss Training Room.
**80 Bendemeer Road
#10-01, S339949**

Time

9AM - 5PM

Price

\$3,700

CPE

CPE Points to come

***Includes 'goodie bag'**

of products such as sets of
files from ProTaper Ultimate,
EdgeEndo X7, XP Shaper Rise
and XP Finisher for clinical use

Synopsis

This year's edition of Everyday Endodontics has expanded to a 4-day hands-on course. Participants will undergo a comprehensive root canal training module from start to end using the operating microscope, modern equipment, and contemporary materials, and will gain practical, hands-on experience in managing complex root canal anatomies.

We are honoured to have Associate Professor Patrick Tseng as a featured speaker in this year's programme, who will share his valuable insight on clinical endodontics. In addition, there will be a strong emphasis on interdisciplinary relationships, with prosthodontic and periodontic inputs, and discussion on patient communication.

With a 5:26 instructor-participant ratio, the small-group mentorship in our course ensures personalized support and feedback. Every clinician will receive timely guidance, and assistance throughout the hands-on sessions. This course is ideal for both newcomers and experienced clinicians to enhance their skills in a dynamic, supportive setting.

Course Outline

Day 1

08:45AM	Registration
09:00AM	Lectures by A/Prof Patrick Tseng: <ul style="list-style-type: none"> • Diagnosis of pulp & periapical diseases • Non-odontogenic pain
10:30AM	Morning Tea 
10:50AM	Lectures by A/Prof Patrick Tseng: <ul style="list-style-type: none"> • Anatomy/C-shaped canals • Access cavities, including pulpal landmarks • Use of ultrasonics and gooseneck burs in the location of root canals
12:00PM	Microscope orientation Hands on: Access cavities on extracted teeth/ location of canals
01:00PM	Lunch 
02:00PM	Hands on: Access cavities on extracted teeth/ location of canals
03:00PM	Lecture: Endodontic pain and managing the “hot pulp”
04:00PM	Lecture: Use of the electronic apex locator
04:20PM	Hands on: Access cavities on extracted teeth/ location of canals
05:00PM	-END-

20 Sept 2025, Saturday

Day 2

09:00AM

Lecture: Introduction to Cleaning and Shaping

- Rubber dam isolation, securing the coronal seal, master apical file size, and creation of a glide path

09:40AM

Lecture: Irrigation in Endodontics

- Including type of irrigant, significance of prep size and needle on irrigant penetration, vapour lock, introduction to adjunctive irrigation techniques such as manual dynamic irrigation and aspiration

10:20AM

Morning Tea 

10:40AM

Lecture: Introduction to Ni-Ti rotary files

11:00AM

Protaper Ultimate:

Lecture and hands-on practice on a plastic block

11:30AM

Edge Endo X7:

Lecture and hands-on practice on a plastic block

12:30PM

WaveOne Gold:

Lecture and hands-on practice on a plastic block

01:00PM

XP shaper and finisher:

Lecture and hands-on practice on a plastic block

01:30PM

Lunch 

02:30PM

Hands on: Cleaning and Shaping of extracted teeth

04:00PM

Lecture: Cracked Teeth

05:00PM

-END-

21 Sept 2025, Sunday

Day 3

09:00AM

Lecture by Dr Leo Song Jie:

- Should I restore this tooth? Assessment of Restorability
 - Tooth factors (perio, endo, prosthodontics)
 - Occlusion considerations
 - Patient factors
- Restoration of the Endodontically-Treated Tooth
 - Cuspal protection, post selection and placement, bonding to the root canal system

10:30AM

Morning Tea

11:00AM

Lecture by Dr Leo Song Jie:

- Contemporary Endodontically-Treated Tooth Concepts
 - Endocrown
 - Biomimetic concepts
 - Deep Margin Elevation
- How to Ensure Success of the Endodontically-Treated Tooth

12:00PM

Lecture: Obturation and bioceramic sealers

01:00PM

Lunch

02:00PM

- Lecture and demo: Warm vertical obturation
- Lecture and demo: Single cone/hydraulic condensation with low wastage tip and Lentulo spiral
- Lecture and demo: Obturation of oval canals

02:30PM

Hands-on: Continuation of C&S and obturation of extracted teeth

05:00PM

-END-

27 Sept 2025, Saturday

Day 4

09:00AM Lecture and demo on fibre posts

10:30AM **Morning Tea** ☕

11:00AM Hands on: Placement of fibre posts

12:00PM Lecture by Dr Ivan Lim and Dr Chew Huimin:
• The periodontal-endodontic relationship

01:30PM **Lunch** 🍴

02:30PM Patient communication group discussion
• Consent taking
• Pain after endodontic treatment
• Analgesics (Pre- and post-treatment) and antibiotics
• Disclosing iatrogenic errors

03:30PM Lecture: Non-vital bleaching

04:00PM Lecture by A/Prof Patrick Tseng:
• Success and survival of endodontically-treated teeth

05:00PM
• Q&A
• Presentation of certificate of completion

05:30PM **-END OF COURSE-**

28 Sept 2025, Sunday

Since 1989

Please Bring Along:

- Your personal dental loupes if you use them at work
- At least 6 extracted teeth including:
 - Premolar with Weine type II canal configuration (two canals that merge apically)
 - At least one tooth with Weine Type IV canal configuration (canals that bifurcate)
 - Tooth with an oval-shaped canal
 - 2 maxillary molars
 - 2 mandibular molars
 - C-shaped molar

Refund: A participant can decide to withdraw from a course at least 7 days of notice prior to commencement date. Refund will take 1-2 weeks. No full refund will be issued if the participant fails to notice Royce Dental Academy in less than 7 working days before commencement date.

Disclaimer: Royce Dental Academy reserves the right to cancel, postpone, or modify the announced course content, limit enrolment, or change the location, time, date, or speaker

Course Director

Associate Professor Patrick Tseng PPA (P), PBS

BDS (Singapore)
MSc Endodontics (London)

Senior Advisor, National University Centre for Oral Health Singapore (NUCOHS)

*Associate Professor, Division of Endodontics, Operative Dentistry and Prosthodontics,
Faculty of Dentistry, National University of Singapore*

Senior Consultant, National University Centre for Oral Health Singapore

Dr Patrick Tseng is the Senior Advisor of the National University Centre for Oral Health Singapore and an Associate Professor in the Division of Endodontics, Operative Dentistry and Prosthodontics at the National University of Singapore (NUS).

He practices full-time Endodontics as a Senior Consultant at the National University Centre for Oral Health Singapore (NUCOHS).

He received his BDS from the National University of Singapore in 1985 and obtained his Masters of Science in Endodontics with Distinction from the University of London in 1990.

Assoc Professor Tseng continues to lecture and conduct hands-on and continuing education courses in Endodontics extensively locally, regionally and internationally.

Testimonials

“Everyday endodontics with contemporary materials was an insightful and interesting course. I learnt about the different systems available for instrumentation and the corresponding obturation techniques. There was hands on practice for the different systems and it was a fun experience. There was always someone available to guide me and show me how the systems are to be used :)”

“Everyday Endodontics with Contemporary Materials was a great course to attend. The contents of the lectures were very useful to keep us updated on the latest techniques and types of files/rotary systems available. The practical sessions were especially useful to help us practice and hone our endodontic skills. It was also fun to be able to experiment with the various file systems and sealants.

The provision of a microscope was a fun experience, to allow us to visualise the entire root canal procedure better. Being able to take post-operative x-rays also allowed us to understand where we were lacking and how to improve ourselves. The endodontists were all very friendly and approachable, and they were all more than willing to teach and guide us along throughout the course.”

“The course was informative and instructors were helpful and approachable. Highly recommended for anyone interested in exploring different file systems and bioceramic sealers! “

“A very comprehensive and practical course, would highly recommend. In particular, the segment on bioceramic sealers was very useful - we learnt much about the background of bioceramic sealers and techniques on how to obturate canals with them.”

“The endodontic workshop has allowed me to learn more about bioceramic sealers, and gave me more confidence to use it in clinical practice. The speakers were knowledgeable and provided excellent guidance throughout, and gave us feedback on our cases and areas of improvement. Would highly recommend this course!”

“

...gave me more confidence to use it in clinical practice.

“Overall, the course was very useful in elevating our skills in endodontics.

“The Everyday Endodontics with Contemporary Materials course was very comprehensive. After a series of detailed and informative lectures, we were taught how to use a microscope. We were able to try out and compare multiple file systems for cleaning and shaping.

We learnt about the use of bioceramic sealers in single cone hydraulic condensation for obturation, which had great sealability and ease of use. After obturating the extracted teeth, we were also able to take post op radiographs and section the obturated roots to better evaluate our root fills.

There was a great instructor to participant ratio which allowed us to easily discuss with and get guidance from the endodontists. There was plenty of time for hands-on work and a wide range of instruments and materials for us to try out and practise. Overall, the course was very useful in elevating our skills in endodontics.”
