# Synopsis

This lecture presents essential principles for optimising dental aesthetics in routine restorative practice.

Attendees will be guided through key diagnostic and clinical factors that influence aesthetic outcomes, including tooth form, proportion, symmetry, soft-tissue dynamics, and material selection.

The session aims to provide clear, actionable strategies that general practitioners can readily integrate into their daily workflows.

By the end of the lecture, participants will be equipped with concise, evidence-based tools to enhance predictability and elevate aesthetic results in everyday restorative care.

This Zoom session is part of our **2026 Zoom Series**, where Royce Dental Group specialists will share their expertise and answer any questions you've had on when and under what circumstances to refer patients. Spanning disciplines such as Orthodontics and Periodontics, this is a **must-attend learning series you don't want to miss!**

# About The Speaker

Dr Leo Song Jie is an accredited specialist in Prosthodontics by the SDC. He specialises in all aspects of Restorative Dentistry, including Aesthetic Dentistry, Implant Dentistry, Full Mouth Rehabilitation and Dentures.

Dr Leo Song Jie graduated with a BDS in 2014 from NUS. Driven by his interest in Prosthodontics, he pursued a MDS in Prosthodontics from NUS after serving in the Prosthodontics department at the NDCS.

He then held positions as a registrar at NUCOHS and an Assistant Professor at NUS, where he still serves as an adjunct lecturer.
